EZICLAD SOLUTIONS

SAVVY SOLUTIONS

STRONG AND SMART ACROSS THE BOARD

Eziclad Solutions is a proud Australian company that has designed and created a poly vinyl chloride (PVC) product to replace the traditional timbers used around the home. Eziclad Capri panels have the same appearance as real timber, but the PVC eliminates the maintenance required when building with real timber, such as sanding, staining, oiling or painting.

Renovation companies are often replacing damaged, unsightly and water logged boards with waterproof and fire retardant linings. Eziclad Capri linings come with a **10 year warranty** against peeling, cracking and zero maintenance is needed.

Supplying all states in Australia, Eziclad's Capri linings are perfect to enhance a front porch, patio, alfresco, verandah or eaves. The strong, robus boards have a unique clip system and an invisible tongue and groove without visible seams, making them a flawless addition to any build or renovation.

Eziclad Capri comes in five popular colours, with all the trims and accessories for a top class, professional finish. Thanks to the smart seamless design. Eziclad Capri is quick and easy to install compared to other products, saving valuable time and minimising the cost of labour.

Whether you are planning to build your dream home or your home is in need of repair. Eziclad Solutions is here for you. The company has introduced new lines into the market; a selection of lifetime, maintenance-free products that will not only replace existing or future products, but will also enhance your most valuable asset – your home – and give it a quality finish. For peace of mind and a straight forward alternative for your finished indoor and outdoor areas, get in touch with Eziclad Solutions today.
